Leveraging automated analysis algorithms

### 24 X 7 X 365 MONITORING
Automated threat analysis of security logs

### MANAGED SECURITY PORTAL
Complete visibility of infrastructure

### FULL COMPLIANCE
Continuous optimisation of protection policy

## A volatile world

Cybercrime generated an estimated $1.5 trillion in 2018. And with **network threats continuing to grow** in quantity and complexity, organisations—and their cyber security teams—are under pressure to ensure their infrastructure and data are secure as possible.

**No organisation is immune** from a potentially devastating cyberattack—no matter what its size, sector, or location. It's not a case of if, but when. And in some cases you've already been breached, you just don't know it.

**To help reduce the risk of such a breach or compromise, organisations need to:**

- Have complete visibility of all their touchpoints
- Use pervasive network monitoring and control to prevent attacks and limit damage.

## Comprehensive protection

In partnership, CDW and Check Point Software Technologies provide comprehensive protection against known and unknown threats to help reduce the risk of breach or compromise.

In conjunction with the ThreatCloud Managed Security Service from Check Point, CDW can **design, install, and manage a complete integrated cyber security value proposition** for your organisation using award-winning Check Point technology. As a 5-Star Check Point partner, CDW leverages its understanding of the security landscape, the customers' unique requirements and delivers a **comprehensive managed security service**.

CDW builds on the extensive range of Check Point cyber security solutions with its in-house certified engineers, global support and managed services capability, and longstanding relationships with its clients.

# FEATURES

## Award–winning technology

Intrusion prevention systems (IPS), Anti–Bot, and Antivirus technology combine to deliver an **integrated defence** against both external and internal threats.

**Real–time intelligence** guides all three components to provide the best pro–active cybersecurity available today.

## Real–time security intelligence feeds

Check Point ThreatCloud is a collaborative network and cloud–driven knowledge base delivering real–time **dynamic secu rity intelligence**.

Based on comprehensive threat and attack information, **updated protection and signatures are automatically transmitted** to every customer's Check Point gateway.

## Optimised protection

CDW customises solutions according to each customer's requirements—and threat protection policies are **aligned to industry–specific compliance** requirements.

## Managed security service web portal

**Complete visibility** of activity on the organisation's gateway, event and alert occurrences, and real–time security intelligence.

Access **predefined reports** about protections, events, alerts, and attacks.
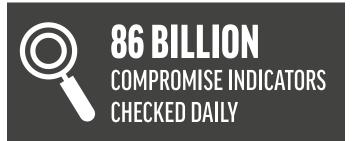

## Policy tuning

Benefit from access to **expert advice** and regular tuning of your organisation's protection policy to reflect the changing landscape and keep performance optimised.

Depending on the service level purchased, tuning varies from quarterly to annually.

---

## MORE THAN 140 MILLION END POINTS PROTECTED
