

WHAT IS HYPERCONVERGED INFRASTRUCTURE?

Hyperconvergence combines storage, computing and networking into a single system to reduce data centre complexity and increase scalability.

HCI is growing at an annual rate of

22.7%*

Up to

20%

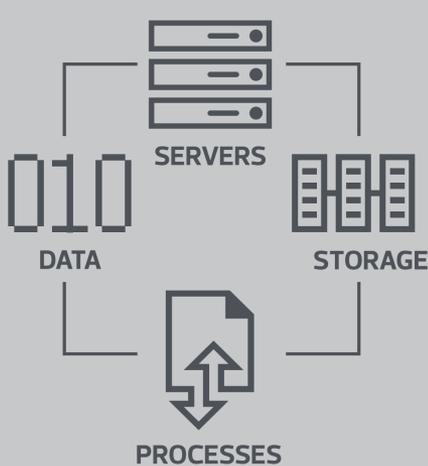

of business-critical applications currently deployed on three-tier

IT infrastructure will transition to HCI by

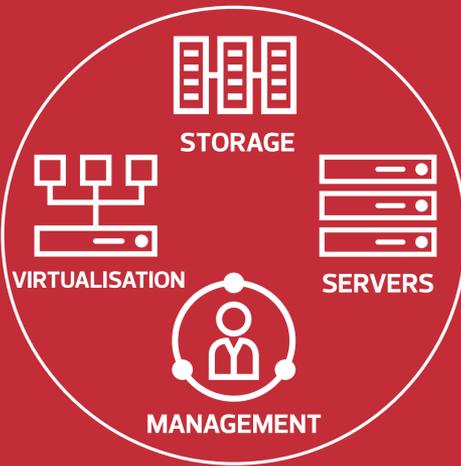

2020**

FROM SILOS TO STREAMLINED

Traditional infrastructure

Hyperconverged infrastructure (HCI)

WHY?

HCI offers

- Ease of purchase
- Simple set-up
- Consolidated management
- Full-stack support

... which empowers your IT team with infrastructure that is

- Easier to manage
- Faster to procure and deploy

... which unleashes business advantage in a digital era

... which enables creation of new apps and services

STRENGTH IN NUMBERS:

CDW AND NETAPP

With NetApp HCI, CDW simplifies how you deploy and manage services across on-premises and public clouds.

Now you can:

Reduce Friction and increase Customer Satisfaction

Eliminate constraints and command your system performance

Deliver new business FASTER

In Partnership: NetApp and CDW

CDW is a NetApp Star Partner, and is strategically positioned to support our customers on an international scale. Collaborating closely with NetApp, our dedicated team of highly accredited experts are here to help you orchestrate coordinated solutions

Learn how CDW can orchestrate the right Cloud solution for your organisation.
